DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18 and 33-44, drawn to methods of administering a pharmaceutical composition comprising a mixture of at least one Free-B-ring flavonoid and at least one flavan, classified in class 514, subclass 27, for example

II. Claims 19-32, drawn to a pharmaceutical composition comprising a mixture of at least one Free-B-ring flavonoid and at least one flavan, classified in class 514, subclass 456, for example.

2. The inventions are distinct from each other because of the following reasons:

Inventions I and II are related as product (i.e. II) and process of use (i.e. I). The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case, the product as claimed (i.e. Baicalein is a Free- B-ring flavonoid) can be used in a materially different process of using that product such as for the treatment of many disorders such as anxiety, insomnia or muscle tension (see, e.g. Wolfson et al. US 7045158, see entire patent, especially column 1 lines 54-65 and figure 3)

3. The several inventions above are independent and distinct, each from the other. They have acquired a separate status in the art as separate subject for inventive effect and require independent searches. The search for each of the above inventions is not

Art Unit: 1655

co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all the above inventions in one application.

Furthermore for Groups I and II, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

The claimed species are:

Elect a specific Free-B-Ring Flavonoid compound

The claimed species are:

Elect a specific Flavan compound

The claimed species are:

Elect a specific plant *genus* for Free-B-Ring Flavonoid

The claimed species are:

Elect a specific plant *species* for Flavan

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for Group I and II above for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument

Art Unit: 1655

that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a)

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirements be traversed (37 CFR 1.143).
